

Ahmad Firas Elaina

AI Engineer • Backend Engineer • Data Science & GenAI/LLM Systems

Amman, Jordan +962 797 379 552 ahmadalaina09@gmail.com linkedin.com/in/ahmad-elaina github.com/A7MAD-04 a7mad04.github.io

PROFESSIONAL SUMMARY

Final-year Data Science student (GPA 3.99) with hands-on backend engineering experience building RESTful APIs and layered service architectures, plus applied experience across the GenAI/LLM stack including NLP pipelines, transformer fine-tuning and model integration. Currently interning at ProgressSoft Corporation across the AI, Data Science and Software Development tracks, shipping backend services and REST endpoints through a Git-based code review workflow. Author of a peer-reviewed ACM paper on AI-assisted classification pipelines. Looking for an AI Backend Engineer role that combines production backend development with LLM-powered product features.

WORK EXPERIENCE

AI, Data Science & Software Development Intern — ProgressSoft Corporation

Jun 8 – Aug 27, 2026

Amman, Jordan

Software Development Track

- Developed a Spring Boot REST API for a banking style application, adding endpoints for registration, authentication, deposits, withdrawals and fund transfers within a layered service architecture.
- Followed a Git and GitLab feature branch workflow with mandatory peer code review, keeping test coverage above 85% across more than 40 unit tests before every merge.

AI & Data Science Track

- Practiced core machine learning and deep learning concepts through guided exercises, including MLPs, CNNs and transfer learning.
- Explored AI agent workflows and orchestration as part of the applied AI curriculum.

Data Entry Specialist — BRZ

Nov 2024 – Present

Part-Time | Amman, Jordan

- Maintained high-volume delivery order records in Excel, validating and reconciling logistics data across operational datasets.
- Built structured data entry workflows that improved processing speed and reduced error rates for management reporting.

RESEARCH & PUBLICATIONS

End-to-End Data Engineering Pipeline for AI-Assisted Project Domain Classification | Published at ACM ICICS '26, May 2026

- Designed an ETL pipeline over 486 records across 38 domains and benchmarked Logistic Regression, Random Forest and BERT. Found and fixed a label leakage bug that raised BERT's macro F1 from 0.05 to 0.52, reaching 67.37% test accuracy. [DOI: 10.1145/3812734.3813717](https://doi.org/10.1145/3812734.3813717)

PROJECTS

SkillLink, AI-Powered Freelance Marketplace | Graduation Project, FastAPI, React/TypeScript, PostgreSQL, Docker | github.com/JACOB22194/skillink-platform

- Led backend and ML for a full-stack marketplace, building a recommendation engine that matches freelancers to jobs by skill similarity, plus 5 ML-driven systems (pricing, launchpad screening, skill-gap analysis) served through FastAPI REST endpoints and containerized with Docker Compose.

Customer Churn Intelligence Platform | Python, Scikit-learn, FastAPI, Docker | github.com/A7MAD-04/customer-churn-platform

- End-to-end churn prediction service (Logistic Regression, Random Forest, Gradient Boosting) with SHAP explainability, served via containerized FastAPI REST endpoints with a revenue-at-risk analytics dashboard.

EDUCATION

Jordan University of Science and Technology (JUST), B.S. Data Science

Expected Sep 2026

Dept. of Computer Information Systems, Irbid, Jordan | GPA: 3.99

- Relevant Coursework: Machine Learning, Deep Learning, NLP, Data Engineering, Cloud Computing, Databases, Statistics, Algorithms

TECHNICAL SKILLS

Languages: Python • Java • SQL • TypeScript • HTML/CSS

Backend & APIs: FastAPI • Spring Boot • REST API Design • JWT/Session Auth • Docker • Docker Compose • Git/GitLab CI

AI, GenAI & LLMs: PyTorch • Transformers/BERT • Hugging Face • Prompt Engineering • LLM Integration • AI Agents • Fine-tuning • NLP Pipelines

Data & ML: Scikit-learn • Pandas • NumPy • ETL Design • Feature Engineering • PostgreSQL

Visualization: Matplotlib • Seaborn • Power BI

Tools: Git • GitHub/GitLab • Docker • Jupyter Notebook

CERTIFICATIONS

Certification	Issuer	Credential
Data Parallelism: Training Deep Learning Models on Multiple GPUs	NVIDIA DLI	View Certificate
Building Transformer-Based NLP Applications	NVIDIA DLI	View Certificate
Harnessing the Power of Data with Power BI	Coursera / Microsoft	View Certificate

LANGUAGES

Arabic, Native English, Professional Working Proficiency
