

Ahmad Firas Elaina

Amman, Jordan +962 797 379 552 ahmadalaina09@gmail.com linkedin.com/in/ahmad-elaina github.com/A7MAD-04 a7mad04.github.io

PROFESSIONAL SUMMARY

Recent Data Science graduate (GPA 3.99) with hands-on experience across the ML lifecycle, from data engineering and model development to deployment via REST APIs, plus backend engineering experience with RESTful APIs and the GenAI/LLM stack. Currently interning at ProgressSoft Corporation and co-author of a peer-reviewed ACM paper. Looking for an ML Engineer role combining production model development with LLM-powered product features.

WORK EXPERIENCE

AI, Data Science & Software Development Intern — ProgressSoft Corporation Jun 8 - Aug 27, 2026
Amman, Jordan

Software Development Track

- Developed a Spring Boot REST API for a banking style application, adding endpoints for registration, authentication, deposits, withdrawals and fund transfers within a layered service architecture.
- Followed a Git and GitLab feature branch workflow with mandatory peer code review, keeping test coverage above 85% across more than 40 unit tests before every merge.

AI & Data Science Track

- Practiced core ML/DL concepts (MLPs, CNNs, transfer learning) and explored AI agent workflows and orchestration.

Data Entry Specialist — BRZ Nov 2024 - Present
Part-Time | Amman, Jordan

- Maintained high-volume delivery order records in Excel and built structured data entry workflows that improved processing speed and reduced error rates.

PUBLICATIONS & PROJECTS

End-to-End Data Engineering Pipeline for AI-Assisted Project Domain Classification

Published at ACM ICICS '26, May 2026 • DOI: 10.1145/3812734.3813717

- Designed an ETL pipeline over 486 records across 38 domains and benchmarked Logistic Regression, Random Forest and BERT; fixed a label leakage bug that raised BERT's macro F1 from 0.05 to 0.52, reaching 67.37% test accuracy.

SkillLink, AI-Powered Freelance Marketplace

Graduation Project, FastAPI, React/TypeScript, PostgreSQL, Docker | github.com/JACOB22194/skillink-platform

- Led backend and ML for a full-stack marketplace: built a skill-matching recommendation engine plus 5 ML-driven systems (pricing, launchpad screening, skill-gap analysis), served via FastAPI and containerized with Docker Compose.

Customer Churn Intelligence Platform

Python, Scikit-learn, FastAPI, Docker | github.com/A7MAD-04/customer-churn-platform

- End-to-end churn prediction service (Logistic Regression, Random Forest, Gradient Boosting) with SHAP explainability and a revenue-at-risk analytics dashboard.

EDUCATION

Jordan University of Science and Technology (JUST), B.S. Data Science Sep 2026
Dept. of Computer Information Systems, Irbid, Jordan | GPA: 3.99

- Relevant Coursework: Machine Learning, Deep Learning, NLP, Data Engineering, Cloud Computing, Databases, Statistics, Algorithms

TECHNICAL SKILLS

Machine Learning & Data: Scikit-learn • Pandas • NumPy • PyTorch • ETL Design • Feature Engineering • PostgreSQL

AI, GenAI & LLMs: Transformers/BERT • Hugging Face • Prompt Engineering • LLM Integration • AI Agents • Fine-tuning • NLP Pipelines

Backend & APIs: FastAPI • Spring Boot • REST API Design • JWT/Session Auth • Docker • Docker Compose • Git/GitLab CI

Programming Languages: Python • Java • SQL • TypeScript • HTML/CSS

Visualization: Matplotlib • Seaborn • Power BI

Tools: Git • GitHub/GitLab • Docker • Jupyter Notebook

CERTIFICATES & LANGUAGES

Certification	Issuer
Data Parallelism: Training Deep Learning Models on Multiple GPUs	NVIDIA DLI
Building Transformer-Based NLP Applications	NVIDIA DLI
Harnessing the Power of Data with Power BI	Coursera / Microsoft

Spoken Languages: Arabic (Native) • English (Professional Working Proficiency)
